

# Agile Engineering

## Self Assessment

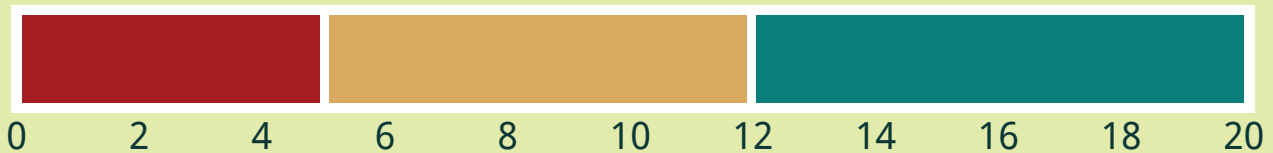

### Test Feedback

How many seconds does it take until you get feedback from a test, after you have entered or changed 1 line of code?

### Tested Changes per Hour

How many individual lines of code can you change, commit and test in 1 hour?

### Manual Push to Production

How many manual steps does it take to get a build into production?

### Distributed Knowledge

How many team members can explain a randomly chosen piece of code?

### Pair Programming

What percentage of your team colleagues did you pair with in the last two days?
